

Date 9th June 2016

Inspiration Healthcare Group plc
("Inspiration Healthcare", the "Company" or the "Group")

**Agreements signed with
Atom Medical and EPMC Pharma**

Inspiration Healthcare Group plc (AIM: IHC), the global medical device company, is pleased to announce that it has signed a one year rolling contract with Atom Medical, the largest manufacturer of incubators in Japan, and a five year contract with EPMC Pharma for the sale of its sucrose products in the UK and Ireland.

The agreement with Atom follows on from the acquisition of Inditherm plc last year with whom Atom had a prior agreement and means the enlarged Group will retain the exclusive rights to sell the wide range of Atom products used in Neonatal Intensive Care Units in the UK.

Atom manufactures a range of specialist incubators used in Neonatal Intensive Care, some of which can be combined with other products sold by Inspiration Healthcare. These include the Acutronic range of ventilators and other neonatal products such as the warming product CosyTherm.

At the same time the Company is pleased to report that it has signed a five year agreement with EPMC Pharma of Belgium, which produces Algopedol, (24% sucrose), an aqueous sterile oral solution used to reduce neonatal pain. Sucrose is currently predominantly used in a hospital environment and it is expected that it will progressively be adopted in the wider medical community. Since 2003, Inspiration has been the UK market leader in the distribution of single dose sucrose products in the UK.

Commenting today, Neil Campbell, Chief Executive Officer, said:

"We are delighted to continue our relationship with Atom Medical with whom the Group has worked for many years and very excited about the opportunity it gives us to combine their incubators with other medical products we sell. It cements our ability to supply a comprehensive range of capital equipment into the NICU and will help build our reputation as a one stop shop of neonatal intensive care equipment in the UK and Ireland.

"We are also pleased to announce today, the agreement with EPMC Pharma, which reinforces our leading position in this area, and look forward to being able to develop this market further."

About Inspiration Healthcare

Inspiration Healthcare (AIM: IHC) is a global supplier of medical technology for critical care, operating theatre and other medical applications. The Company provides high quality innovative products to patients and caregivers around the world that help to improve patient outcomes and efficiencies of healthcare organisations with patient focused customer service and technical support.

The Company's own brand of critical care solutions span non-invasive respiratory management, thermoregulation and diagnostics, and patient warming for newborns through to adults in intensive care and the operating theatre, whilst the distribution business supplies solutions to support specialised surgical procedures and infusion therapies.

Present in over 50 countries worldwide, Inspiration Healthcare's success has been built on continuous innovation, excellent customer service and an inherent commitment to improving the quality of life of patients, working in close collaboration with key opinion leaders and stakeholders in the clinical and medical community across the globe.
