

**Inspiration Healthcare Group plc**  
("Inspiration Healthcare", the "Company" or the "Group")

**Agreement signed with Bio-Med Devices Inc.**

Inspiration Healthcare Group plc (AIM: IHC), the global medical device company, is pleased to announce that it has been appointed as a European service centre for Bio-Med Devices Inc., the US based designer and manufacturer of critical care equipment.

Under the terms of the agreement, Inspiration Healthcare becomes the official preferred servicing partner of the Bio-Med's air/oxygen blenders for the whole of Europe. This will enable quicker repair and warranty cover within Europe and also provide a complete service for all European customers of Bio-Med blenders, including Inspiration Healthcare's European distributors. As a result of the agreement Inspiration is confident it will be able to increase further third party service opportunities in Europe.

The signing of the agreement will also lead to a greater awareness of the use of air/oxygen blenders in intensive care and resuscitation, giving medical staff access to reliable technology across Europe with the objective of improving patient safety and outcomes.

Bio-Med Devices Inc. designs and manufactures a range of Critical Care equipment and is one of Connecticut's 50 fastest growing technology companies. [www.biomeddevices.com](http://www.biomeddevices.com)

Commenting today, Neil Campbell Inspiration Healthcare's Chief Executive Officer said " We are very pleased to have signed this agreement with Bio-Med with whom we have been working for many years. This will allow us to improve significantly the level of servicing of these units as well as broadening our presence in European hospitals."

**About Inspiration Healthcare**

Inspiration Healthcare (AIM: IHC) is a global supplier of medical technology for critical care, operating theatre and other medical applications. The Company provides high quality innovative products to patients and caregivers around the world that help to improve patient outcomes and efficiencies of healthcare organisations with patient focused customer service and technical support.

The Company's own brand of critical care solutions span non-invasive respiratory management, thermoregulation and diagnostics, and patient warming for newborns through to adults in intensive care and the operating theatre, whilst the distribution business supplies solutions to support specialised surgical procedures and infusion therapies.

Present in over 50 countries worldwide, Inspiration Healthcare's success has been built on continuous innovation, excellent customer service and an inherent commitment to improving the quality of life of patients, working in close collaboration with key opinion leaders and stakeholders in the clinical and medical community across the globe.

### **About Bio-Med Devices**

Bio-Med Devices, is an ISO 13485 registered company which designs, manufactures, and markets a complete line of critical care and transportable respirators/ventilators, air/oxygen blenders, ventilation monitors, disposable and reusable breathing circuits, and accessories.

Bio-Med's products are small, lightweight, sophisticated systems incorporating state-of-the-art electronics and pneumatics; they include infant and adult ventilators built specifically for use in MRI environments. All of Bio-Med's ventilators and blenders bear the CE Mark, signifying compliance with the European Medical Device Directive.
